Decision Rationale & Reasoning

REJECT - Settlement: Rs. 0 - Confidence: 90%

Why This Decision? - Plain-Language Explanation

- * Fraud score of 66 is high and indicates potential fraud, although it does not exceed the critical threshold of 70
- * Policy expiry date (2026-04-01) is 68 days before the incident date (2026-06-08), making the claim ineligible for coverage as per policy terms
- * No FIR uploaded for the 'Motor - Third Party' claim, which is mandatory for such incidents (FI-CLM-003)
- * Plate visible in the image (WB14L0428) may not match the policy vehicle (Toyota Innova Crysta GX (TN07CD5678)), indicating a potential vehicle substitution

Agent 5 - Settlement Reasoning Trail (7 Steps)

- Step 1: Damage Assessment indicates significant front-end damage consistent with a collision, but this is not sufficient to approve the claim due to other red flags
- Step 2: Fraud Intelligence reveals a high fraud score and several indicators of potential fraud, including the policy expiry date and lack of FIR
- Step 3: Incident Reconstruction confirms that the damage matches the story, but this is not enough to outweigh the other concerns
- Step 4: Context & Policy verification shows that the policy had expired, making the claim ineligible for coverage
- Step 5: Historical Precedents do not provide a direct match, but the high fraud score and policy expiry date are significant concerns
- Step 6: Settlement Calculation is not applicable due to the rejection of the claim
- Step 7: Final Decision is to reject the claim based on the high fraud score, policy expiry date, and lack of FIR
